THE NEW WILSON Oscillating Shuttle SEWING MACHINE

Is wonderful in its conception, unprece in textile fabrics and leather. Its motions are continuous, admitting of an extraordinary rate of speed, either by steam or foot power. Every motion of the treadlo makes six stitches, thus producing about one-third more work in a day than other Sewing Machines. It has no stop motions, and tightens the stitch with the needle out of the fabric. It uses the well-

known Wilson Compound Feed on both sides of the needle. It has two-thirds less parts than any other first-class Sewing Machine. Its arm is fully eight and one-half inches long and five and one-half inches high, and the whole Machine is very compactly and scientifically constructed in proportions, elegance, design and appearance. Its simple, powerful and perfect mechanism places it as far in advance of all other Sewing Machines as the telephone is superior to the tin speaking tube. The WILSON MENDING ATTACHMENT, for repairing all blade of the time of th kinds of textile fabrics WITHOUT PATCHING, furnished FREE with all WILSON SEWING MACHINES.
